## Do You Need Total Seal Rings? **You Be The Judge.**

Two-piece  
interlocking  
ring provides  
Gapless Seal

### With Total Seal® Gapless® Piston Rings -

- ★ Your engine sounds crisper and produces more low and mid-range torque
- ★ Blow-by is all but eliminated
- ★ Cylinder leak down is less than 2%

When rings don't seal properly, excessive blow-by at any rpm contaminates and heats engine oil, causing elevated oil temperatures; accelerated crankshaft, bearing, cylinder wall and camshaft wear; reduced long term power output — and possibly engine failure. The only way to avoid it is to rebuild an engine every few races. Or install Total Seal Gapless rings.

Total Seal rings continue to offer maximum cylinder sealing race after race — even season after season. The payoff is more consistent performance, fewer oil changes, fewer rebuilds and reduced engine expense. So you can race longer and harder and spend less. **And Finish.**

## Total Seal - Power that lasts
